

Realtor.com[®] Integrating RealSatisfied Client Recommendations into Find-a-Realtor Profiles

Realtors[®] Can Easily Approve and Import Client Recommendations From Multiple Sources in One Place on realtor.com

SAN JOSE, Calif. – July 9, 2013 – [Realtor.com[®]](#), the leader in online real estate operated by [Move, Inc.](#) (NASDAQ: MOVE), announces that Realtors[®] have the ability for the first time to integrate their [RealSatisfied](#) client recommendations into their Find-a-Realtor profiles using the [HyperSocial[™] Tools](#) available for free on realtor.com[®].

“We’re thrilled to be the first major online real estate platform to offer this capability as it will be incredibly beneficial to both Realtors[®] and consumers alike,” said Ernie Graham, senior director of product management for realtor.com[®]. “This integration will help consumers make better decisions when selecting a real estate agent to assist in buying or selling a home. Realtors[®] no longer have to do the extra legwork of combining client recommendations online.”

RealSatisfied, a service measurement platform designed exclusively for the real estate industry, sends customer satisfaction surveys to both homebuyer and seller clients on behalf of Realtors[®] at the close of transactions. Originally only available to view on social media channels, consumers can now access verified reputation content on realtor.com[®].

The tools include easy-to-use widgets for Realtors[®] to publish client recommendations on their own websites. These recommendations can be enhanced with pictures, video and other social features powered by the HyperSocial Tools on realtor.com[®] (realtor.com/hypersocial). “We strongly encourage all Realtors[®] to claim their realtor.com[®] profiles (marketing.realtor.com/engage) and take advantage of our free HyperSocial Tools,” Graham said.

“We are proud to be the first company chosen by realtor.com[®] to share verified client recommendations and testimonials on this platform,” said Jeff Turner, RealSatisfied's North American president. “We support realtor.com's mission to ensure that agents control their data, especially data related to their performance with clients.”
